SRI GANESH TIMBER DEPOT

WHY TO CHOOSE WOODEN PACKAGING ?

Wooden packaging constitutes 80% of the packaging of major goods world over, as most of the pallets are made from wood. Wood is easily convertible, environment friendly, not energy intensive. Wooden packaging material are of softwood, hardwood or the mixture of both. Each type of wood has their own advantage but generally wood is inexpensive, durable and can be recycled.

OUR MANUFACTURING FACILITIES

HEAT TREATMENT & FUMIGATION (ISPM15) :

Heat treatment (HT) works by maintaining a specific time/temperature curve so that the centre of the treated wood remains at a minimum temperature of 56°C for a minimum period of 30 minutes. This process takes place in chambers designed especially for this purpose where the temperature of the wood is measured using sensors on different pieces of wood in different parts of the chamber. Hot air is circulated around the chambers in order to keep the air at a constant temperature. This system eradicates any insects living inside the wood that could cause an outbreak of disease or plague.
